

Measurement app

# Measure directly on the microscope

No more rulers. Measure length, diameter,  
angle and more directly on the microscope.  
Great for measuring product defects.

“  
With onscreen measurements, we can  
detect and document product defects.  
It's so easy

## Results

# Better communication

When receiving a photo of a magnified metal part, it's hard to know how big a scratch is. But with Measurement app, all the information is on the photo, creating better and more efficient communication.

## How to

# Measure, save and share

## Measure

- ✓ Use tool menu to choose your preferred measurement
- ✓ Choose between length, polyline, area, diameter, angle and more
- ✓ Add text boxes and arrows to highlight an area of the inspection photo

## Save and share

- ✓ Save an image of your inspection with or without the measurements you've made
- ✓ Send the photo to colleagues or supply chain partners
- ✓ [Read more about Measurement app](#)
