

Ruler app

Measure objects for easy checks

The integrated Ruler app, a piece of measurement software for digital microscopes, makes sure that controlling any magnified object is quick and precise.

On-screen measurement makes it
easy to do a **quick quality check**

TAGARNO

Optimize

Perform quick and accurate size controls

Simply activating the Ruler graphics vertically and/or horizontally as an overlay directly on the screen.

Then place the object and change the color of the ruler to create a contrast to the object color. No external computer needed, the microscope is the computer.

Ready to inspect and quality assure, just like that.

How to

Easy and colorful

Easy but custom

Effortless measurements

Painless and accurate measurements of any object.

Choose direction

Take a pick between having a ruler displayed horizontally (top, center or bottom) or vertically (left, center or right). It's also possible to trigger both rulers at the same time.

Choose the color

Change color

Simply change the color of the ruler to create a contrast to the object.

Precision

Precision of ruler: 0.5 %.

Precision will vary when the Ruler is placed left, right, top and/or bottom.
